

Polstal and Temet enter a strategic partnership.

Polstal has entered into a strategic manufacturing partnership with Temet, a global leader in civil protection and protective shelter solutions.

Polstal will produce shelter-specific components at its facility in Sosnowiec, Poland, supporting Temet's ability to bring their engineering standards closer to key markets.

Polstal has been selected as part of Temet's network of partners, recognised for our expertise in precision steel fabrication and our ability to deliver to the high standards Temet's protective infrastructure requires.

Demand for civil protection solutions continues to grow across Europe, and through this collaboration, Temet strengthens its capabilities to respond effectively to that demand.

Temet, headquartered in Finland, has been a trusted partner to governments, defence forces, and critical infrastructure operators across more than 55 000 shelters in 85 countries for over 70 years. We are proud to contribute our manufacturing expertise and central European location to a mission that protects lives and secures critical operations worldwide.
